Services And Infrastructure

The skilled technical team at Liberty-Lane handles the repairs, services, upgrades and sales of various makes and models of computers, monitors, TVs, plotters, printers, networking equipment and peripheral hardware. With a fully equipped repair centre and pro-active service agents, Liberty-Lane is the perfect choice for all your hardware and software requirements.

At Liberty-Lane we will first try to extend the lifespan of your existing equipment by repairing it, instead of simply recommending replacements. If you do need to replace a part, or purchase new equipment, we will source high-quality products at the most competitive prices. Whether you are looking for new or refurbished IT equipment, we can advise you on the best solution to fit your budget and objectives.
